Litter

Our playground is clean from litter.

We have lots of bins around school for our rubbish.

We have done some litter picking in school but do not have regular litter picks in place.

Waste

We recycle our paper.

We dispose of our food waste from dinner in a special bin.

Mrs Frogson tries to buy things that are recycled, such as toilet roll and paper towels.

We don't run any recycling projects to make money for our school or within the community.

Energy

Sometimes lights were left on in the classroom when it was empty.

All our windows are draft proof.

Some windows and doors were left open when the heating was on.

All the whiteboards were switched off when not in use.

Computers were left on when they were not being used.

Water

All taps are push taps.

We use rain water to flush our toilets and have 2 buttons to choose from when flushing the toilet.

Mrs Mercer makes sure that leaking taps are fixed straight away.

School Grounds

We have a growing area in our playground where we grow plants, herbs and vegetables.

We have lots of benches around our playground.

We have 2 outdoor classrooms and we have lessons outside.

Biodiversity

We have lots of plants in containers, pots and beds in the school grounds.

We attract wildlife to our school grounds as we have bird feeders , logs for bugs and we have plants and trees.

Transport

The taxi and minibus drop and pick up times are safe. We don't have any problems with cars outside school.

Some children walk to school.

Staff can store their bikes safely if they came to school on them.

Health Living

We have healthy meals and snacks in school.

We are taught about making healthy food choices in lots of lessons.

Every child has a water bottle and we can fill these up in the day as much as we need to.

We have opportunity for physical exercise everyday through playtime activities, clubs and PE.

Global Perspective

We have been learning about different countries throughout school.

We don't always think about our environment.

We don't always know how our actions affect other people in the world.

Suggested Action Points

Set up a regular litter picking club.

Organise a recycling event that will help raise money for our school or that will help our community.

Switch off computers when they are not being used.

Get a water butt in the playground and use the water to water the plants.

Make better use of our growing area in the school grounds.

Suggested Action Points

Create a bug hotel in the outdoor classroom.

Cook more healthy foods in our food technology lessons and when we are at Harmony House so that we can enjoy healthy foods.

More opportunities to learn about how our actions impact the world.
