

Water – Children Learn about Effective Water Use and Water Waste

Actions:

1. Children visit Ewden Water Treatment Works to learn about how water is collected, cleaned and treated. Children also learn about the jobs that people do at the Water Treatment Works.
2. Yorkshire Water visit school to develop pupil's knowledge of using water effectively and how our water is cleaned.

Impact and Evaluation:

1. Children enjoyed their visit to the treatment works and learnt a lot about how our water is cleaned, treated and distributed. We took lots of photos on our trip. Pupils wrote an account of their visit / learning. See Green Flag Award File 3 for further information.
2. A representative from Yorkshire Water spent the day in school, supporting all pupils from across Lower and Upper School. Pupils learned about Yorkshire Water jobs, the learned how water leaks are fixed, how water is cleaned and what items they are allowed to put down the toilet. We have lots of photos of our visit and pupils wrote an account of what they learned for the Eco Newsletter.
